Summary

Full-stack developer skilled in the MERN stack, with hands-on experience building production-grade applications, designing scalable REST APIs, and delivering industry-level projects utilized by real-world users. Strong foundation in data structures, object-oriented programming, and database management systems.

Experience

Freelance Web Developer *Jan 2026 – Present*
Dhruwraj Healthcare — Remote

Custom ERP Software *erp.dhruwraj.com*

- Developed a full-stack MERN ERP to centralize clinic operations, featuring role-based dashboards and secure JWT-based access control for patient, clinic, inventory, and financial data.
- Engineered a comprehensive finance engine with automated invoicing and a transaction ledger, reducing manual bookkeeping and improving billing accuracy.
- Built data-driven modules for inventory, staff, and patient management, including dynamic analytics for revenue and profit tracking via date-wise filtering.

Brand Display Website *www.dhruwraj.com*

- Developed and deployed a high-performance static website using React.js and Tailwind CSS, ensuring a fully responsive UI/UX for local clinic patients.
- Architected a serverless hosting solution on Google Firebase, leveraging the free tier to minimize initial overhead while establishing a scalable infrastructure for future growth.
- Integrated a custom lead generation system using forms connected to the WhatsApp API with pre-filled messaging, streamlining the consultation booking process.

Internships

SQL Developer Summer Intern *May 2024 – Jul 2024*
Celebal Technologies — Remote

- Designed a normalized MySQL relational database schema to ensure data integrity for critical financial transactions including fund transfers, deposits, and transaction history logging.
- Developed optimized JDBC-based backend services that improved transaction processing speed by 10% and maintained 100% data integrity across hundreds of financial records.

Projects

Role-Based News Portal *thenewsone.vercel.app*
Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, RBAC

- Architected a full-stack MERN content management system (CMS) with secure Role-Based Access Control (RBAC), defining distinct permission levels for Admin, Editor, and User roles.
- Designed and implemented robust RESTful APIs supporting complex CRUD operations and a complete editorial publishing workflow from Draft to Published state.
- Implemented JWT-based authentication and authorization ensuring secure session management across all user roles.

Skills

Languages: Java, JavaScript, SQL
Frontend: React JS, TailwindCSS, HTML5, CSS3
Backend & Database: Node.js, Express.js, MongoDB, MySQL, RESTful APIs
Tools & Concepts: Git, GitHub, Google Firebase, JWT (JSON Web Tokens), Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS , Canva
Networking: Routing & Switching, TCP/IP, DNS, DHCP, VPN, Firewalls, Network Troubleshooting, Incident Management, Network Monitoring
Methodologies & Practices: Agile, SDLC

Education

Bachelor of Technology (B.Tech) — Computer Science and Engineering *2021 – 2025*
Allenhouse Institute of Technology , Kanpur *CGPA: 7.44 / 10.0*
Intermediate - PCM *2020 – 2021*
Air Force School , Kanpur *85%*
High School *2018 – 2019*
Air Force School , Kanpur *84.5%*

Achievements & Certifications

- Solved 100+ algorithmic problems on LeetCode.
- 4-Star in Java and 3-Star in SQL proficiency ranking on HackerRank.
- Certified in SQL and Database Management by Infosys Springboard.
- Certified in Network Management and Web Development with Ethical Hacking.
